My Fakes and Counterfeits

Tower of Babel

The world, like the Tower of Babel or my grandmother's deck of cards, was made out of stories, and it was always on the verge of collapse.

Michael Chabon, *Moonglow*, pub. 4th Estate, 2016

Joan's hand

Tower of Babel (after Athanasius Kircher) 2014

[illegible][illegible]

the first of the 1980s. The first of the 1980s was a period of rapid growth in the number of people taking part in the program. In 1980, there were 100 people taking part in the program. By 1985, there were 1,000 people taking part in the program. By 1990, there were 10,000 people taking part in the program. By 1995, there were 100,000 people taking part in the program. By 2000, there were 1,000,000 people taking part in the program. By 2005, there were 10,000,000 people taking part in the program. By 2010, there were 100,000,000 people taking part in the program. By 2015, there were 1,000,000,000 people taking part in the program. By 2020, there were 10,000,000,000 people taking part in the program. By 2025, there were 100,000,000,000 people taking part in the program. By 2030, there were 1,000,000,000,000 people taking part in the program. By 2035, there were 10,000,000,000,000 people taking part in the program. By 2040, there were 100,000,000,000,000 people taking part in the program. By 2045, there were 1,000,000,000,000,000 people taking part in the program. By 2050, there were 10,000,000,000,000,000 people taking part in the program. By 2055, there were 100,000,000,000,000,000 people taking part in the program. By 2060, there were 1,000,000,000,000,000,000 people taking part in the program. By 2065, there were 10,000,000,000,000,000,000 people taking part in the program. By 2070, there were 100,000,000,000,000,000,000 people taking part in the program. By 2075, there were 1,000,000,000,000,000,000,000 people taking part in the program. By 2080, there were 10,000,000,000,000,000,000,000 people taking part in the program. By 2085, there were 100,000,000,000,000,000,000,000 people taking part in the program. By 2090, there were 1,000,000,000,000,000,000,000,000 people taking part in the program. By 2095, there were 10,000,000,000,000,000,000,000,000 people taking part in the program. By 2100, there were 100,000,000,000,000,000,000,000,000 people taking part in the program.

Lost in Space Scenarios

SUGGESTED STATEMENTS

IN EVENT OF CREW FATALITIES

The President:

I have conveyed to the families of _____,
_____ and _____ the heart-
felt sympathy of both Mrs. _____ and myself.

Those they leave behind have suffered a grievous loss,
but mankind itself will be forever richer because these
gallant men dared accept the opportunity to undertake a
pioneering journey of great challenge and promise.

To those who follow, to those pioneers of heroic
courage and selfless dedication, the paths blazed by these
brave men will beckon through all the years.

#

(If at the time a longer statement on behalf of the Nation
is desired:)

I have conveyed to the families of _____,
_____ and _____ the heart-
felt sympathy of a saddened Nation. The sense of loss felt
by Mrs. _____ and me is keen and personal. Count-
less millions of people at home and abroad must share this

sense of great loss, for these men sailed forth on the seas of space on a mission of great interest and great importance to all mankind. The families of these men have suffered a grievous loss; may they find some comfort in the thought, which so many share, that man's progress has always been won, and still must be won, by brave men who are ready to move out into the unknown without the guarantee of a safe return, and who draw strength from the knowledge that by their going they help to open the way. They have followed a star, in the night of space, and we for whom they went will not forget.

The Vice President:

The deaths of these three men will stand in the annals of exploration as an everlasting example of dedication, courage and the conviction that man's intelligence will one day carry him safely to the stars.

Tycho Crater

(1)

Jerome shows me a rough drawing.
It looks like a map he has made on
gold paper. He says it is a crater on
the moon. & He thinks it is a city.
& he points at a communication tower
where phone signals get picked up.

I say that I didn't know telecommunica-
tions could reach the moon. I say
how do you know this? Is it because
your name is Jerome like Thorvald.
Jerome is Man who fell to Earth?
Jerome says that's not my name.

2 I Since we spoke on 14 January, when I passed you a note asking
for any personal comments, I have had the benefit of a discussion with
Sir Jeremy Gresham. That meeting was extremely useful. It was in
fact the first time that the arguments in support of the case that there
is no need for a further global decision had been put as clearly in detail
as I have been able to obtain. valuable background information on the
history of the negotiations has been provided (44). Dr Jerome made some
important points, which I have considered carefully. I am preparing a
more detailed note of advice, which will set out my conclusions in
relation to these arguments.

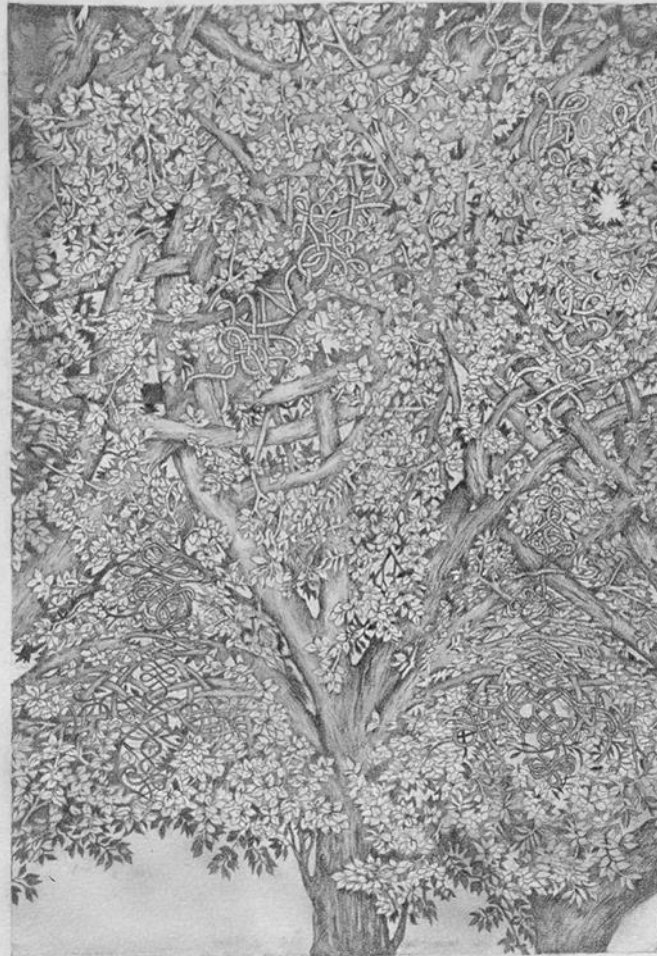

3. I have also indicated to Sir David Manning that I would welcome the opportunity of arrangements can be made in time, to meet the women of my U.S. constituency on the interpretation of resolution 1441. I am not convinced that this will make any difference to my vote, but remain ready to hear any arguments.

As you should be aware that, notwithstanding the additional arguments set forth since our last discussion, I remain of the view that the former legal interpretation of paragraph 12 of the resolution is not in line with the use of military force under a further determination by the Security Council, pursuant to paragraph 12 of the resolution. Our line's conduct indicates that it has failed to take the final opportunity granted by the Council. Longtime such arguments can be made to support the view that paragraph 12 of the resolution merely requires a Council decision, rather than a further determination. If a finding is made that the arguments in this order, my view remains that a further decision is required.

I have not argued this point further.

(6th Feb 16)

Prof. Stephen Hawking in the Reith Lecture, discussed the

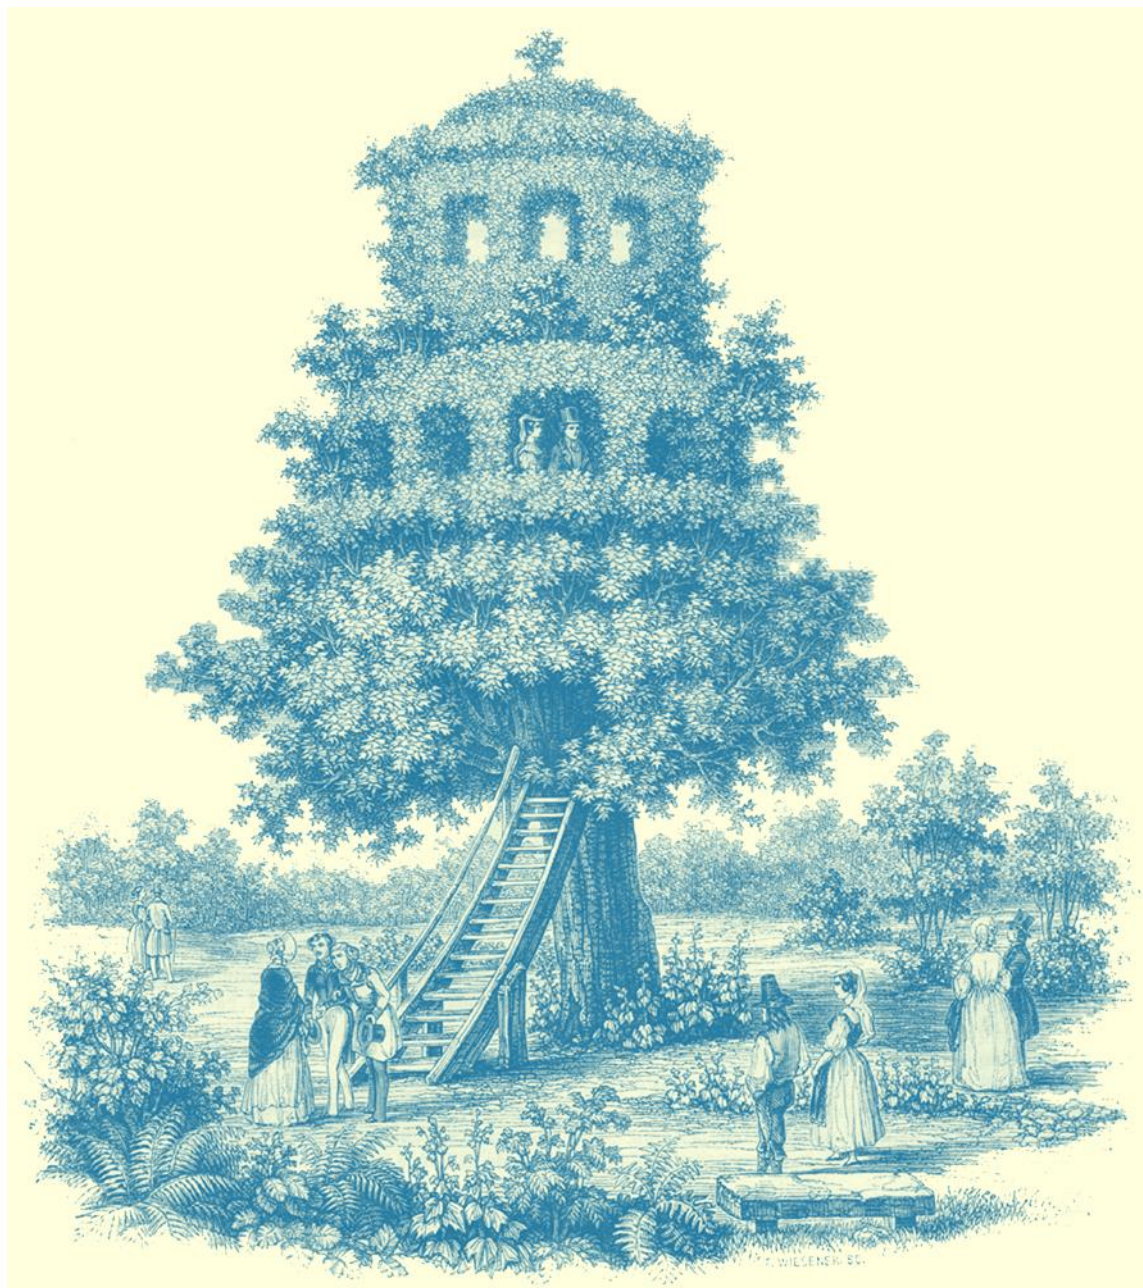

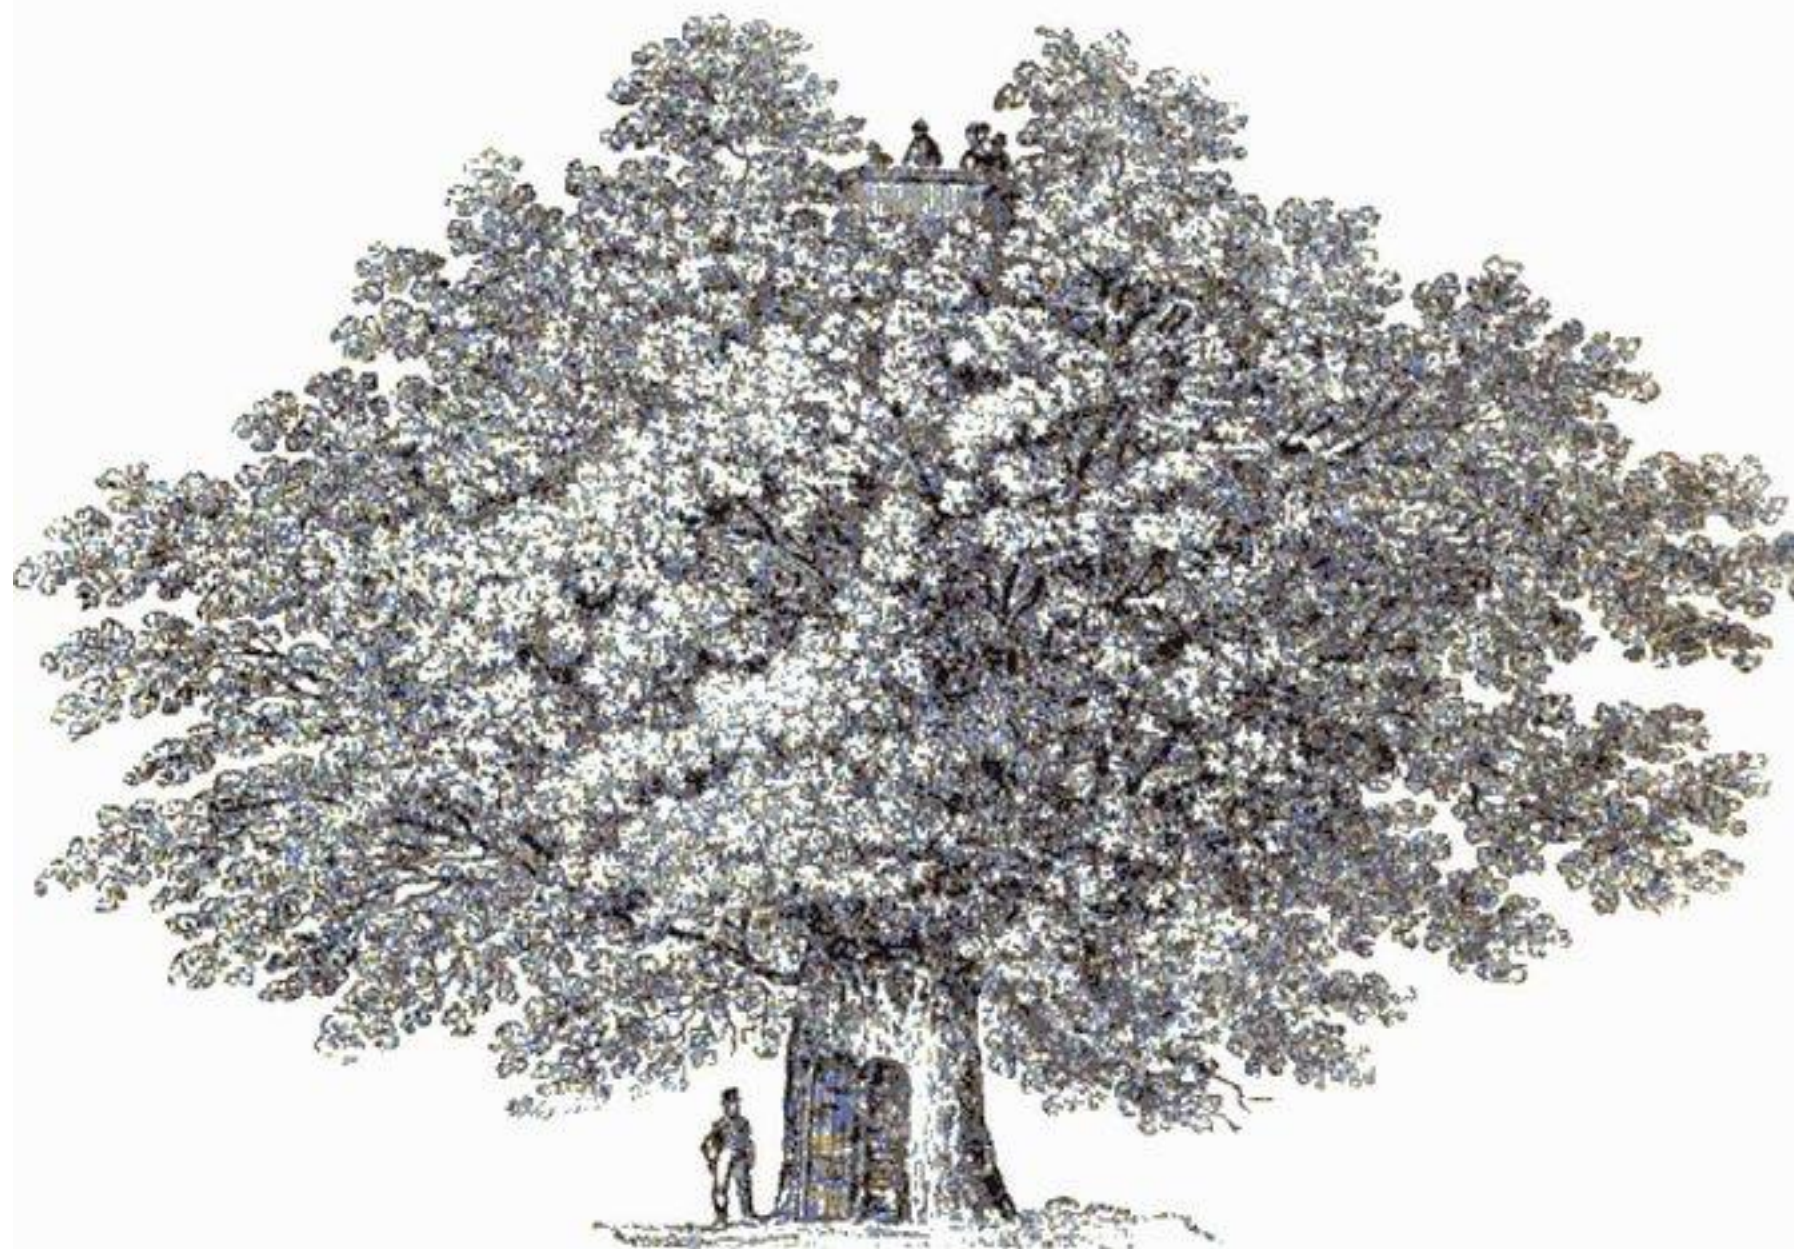

some benign force but a social black hole.

These are places our ^{collective} memory systems that stave off the social death dimension that threatens our culture.

↑ As a teenager I suffered typical questions —
Why pain, why death? I thought books would give me the answer but were only the only certain questions.
The my part particular — often scientific — interests have not always fit easily into an art practice — I don't actually enjoy abstract discussions — I like to make things, I like action —
& — maybe surprisingly — I've found I'm interested in answers that are not in books. The Art making is a way to seek knowledge that that does not come with scientific certainty but is the existential authority that each person must find on her own.

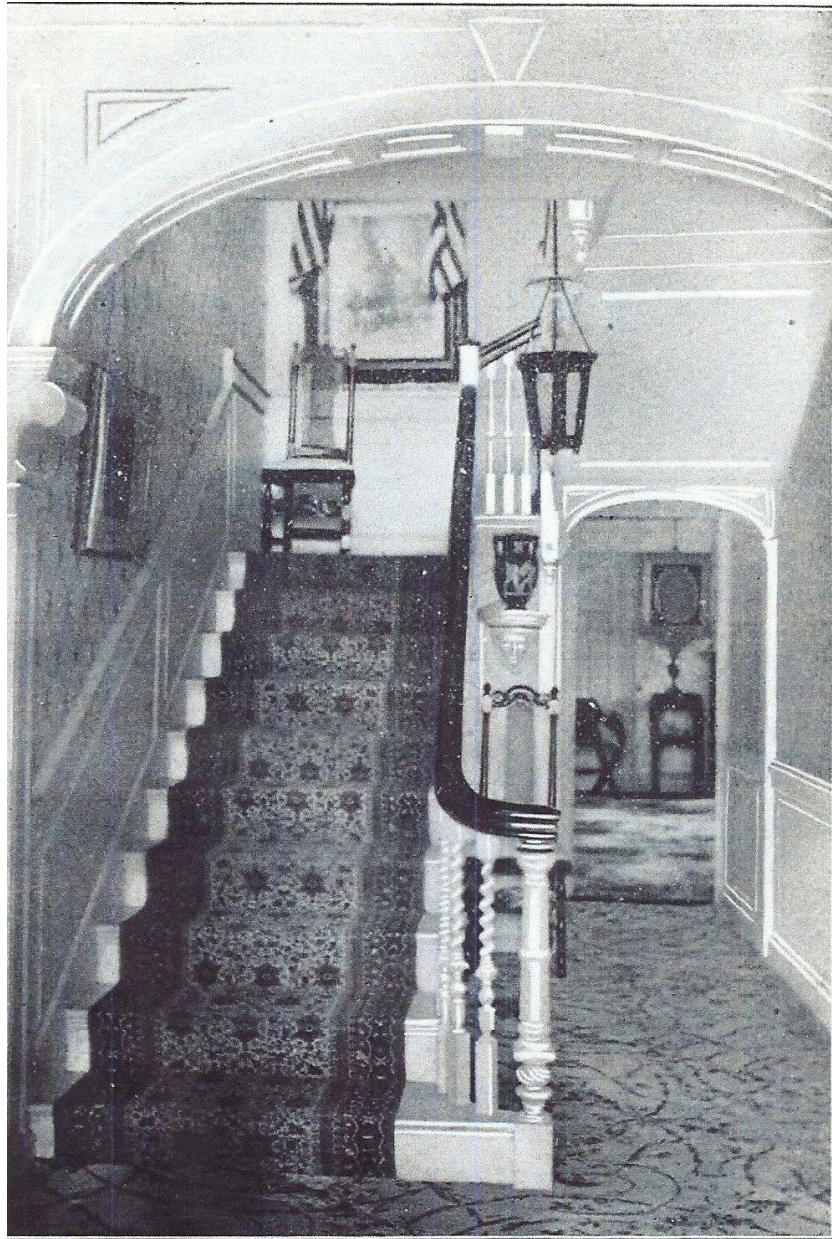

Artworks ... are special kinds of historico-material objects, and this specialness resides somehow in their own ambition to transcend their mere historicity and their mere materiality.
