

ANNEX A

Automotive Industry-Relevant Companies Operating in the Uyghur Region

This annex contains all companies named in the “Driving Force” report that are operating in the Uyghur Region and that mine, produce, or manufacture materials or parts relevant to the automotive supply chain. Hyperlinks connect the company to their profile page on the Driving Force interactive supply chain. Because the automotive parts manufacturing industry is rapidly expanding in the Uyghur Region, many of these companies have only begun operating in the last year or two. For those, we have very little information. For many of the mining or processing companies, we have significant information, including participation in labor transfers and other repressive government programs.
